

CREATE A DATABASE IN CLOUDANT DB

Team ID: PNT2022TMID33446

Team Members: Suriyaprakash S, Rajesh G, Sujith M, Ragul R.

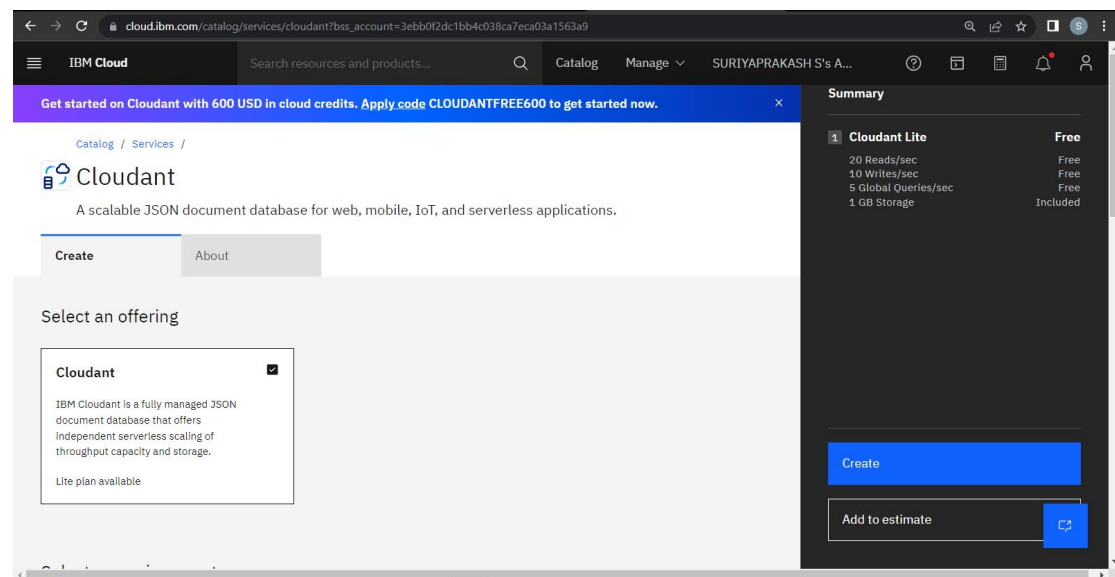

Project: Gas Leakage Monitoring and Alerting System for Industries.

Create a Database in Cloudant DB:

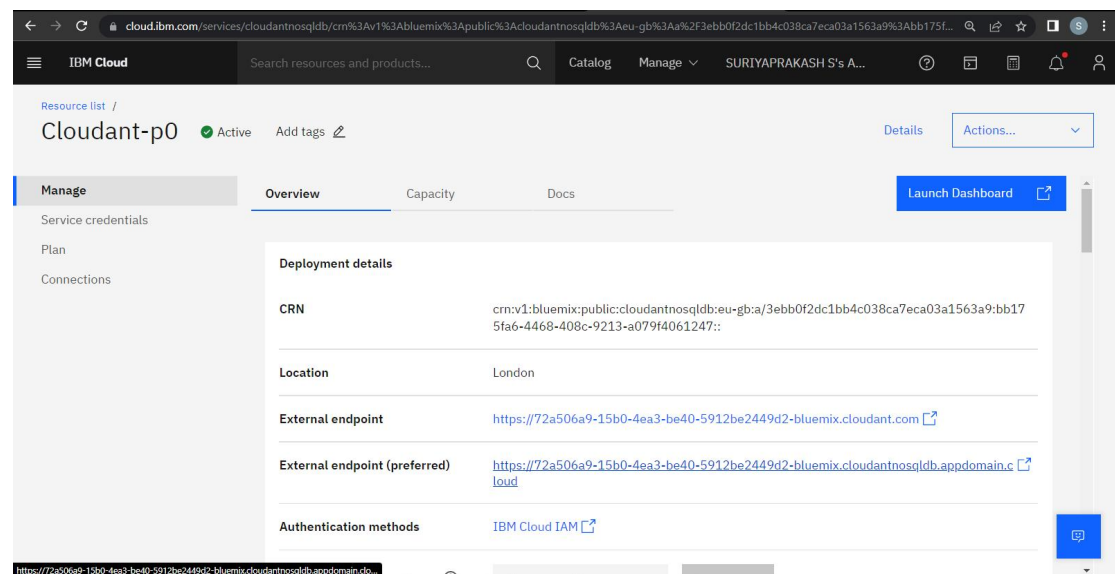

Aim: To create a database in cloudant DB to store location data.

Steps followed:

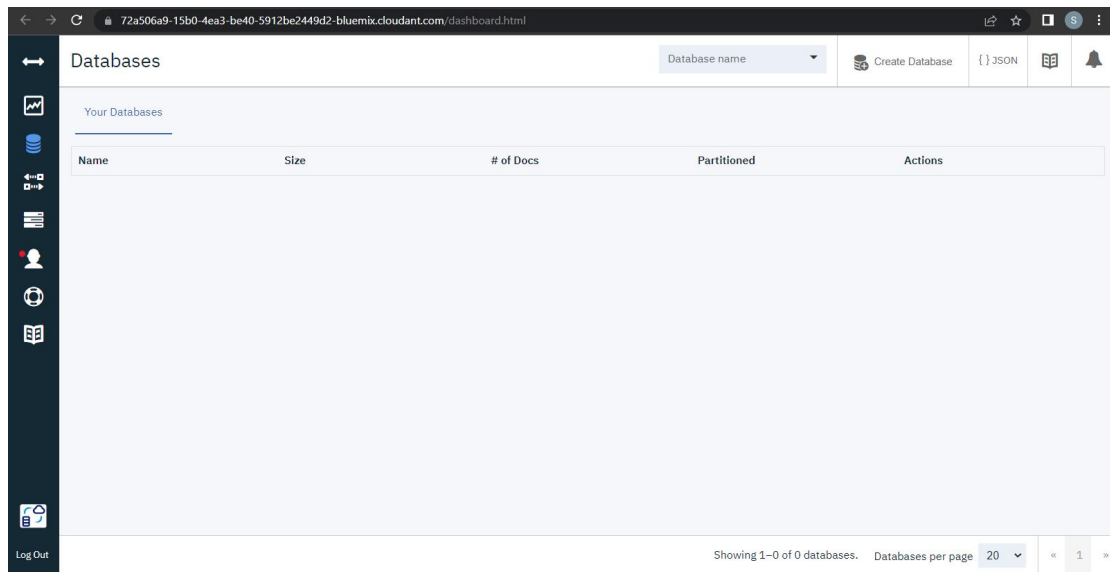

- Logged in to IBM Cloud Account.
- Navigate to Resoure list in Navigation menu.
- Click on the “Create Resource+” button.
- Search for Cloudant.
- Choose “Lite version” and Click Create button.

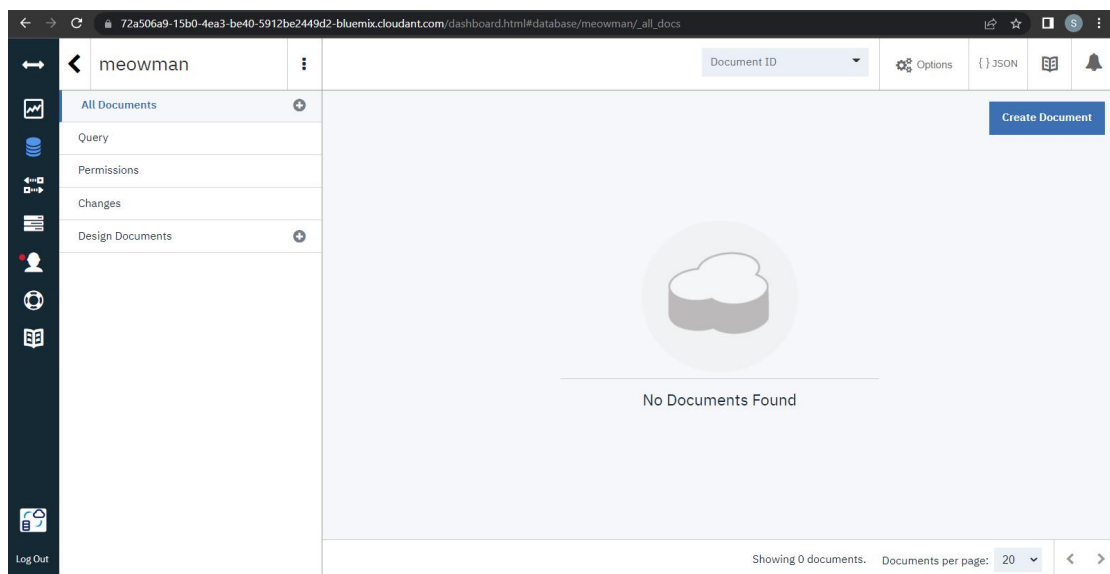

- The Cloudant database resource was successfully created.

- Click “Launch Dashboard”.

- Click **"Create Database"** and Enter name as **"meowman"** and option as **"Non-partitioned"** option.

- The database **"meowman"** created successfully.

Result:

A database to store location data was created successfully in Cloudant.
